

Statement Regarding National Defense Authorization Act (NDAA)

In August 2018, National Defense Authorization Act for Fiscal Year 2019 (US Government appropriations and procurement) was signed into U.S. Law.

The Act includes video surveillance equipment under the “covered telecommunications equipment” definition and calls out specific vendors, cameras, and components which are expressly forbidden for use in US Government-related video surveillance deployments.

Section 889(a)(1)(A) of the National Defense Authorization Act (NDAA) prohibits the U.S. Government from buying and using “covered telecommunications equipment or services” from certain Chinese companies and their subsidiaries or affiliates (“Part A”). NDAA Section 889(a)(1)(B) prohibits the Government from contracting with any entity that uses any equipment, system, or service that uses “covered telecommunications equipment or services” as a substantial or essential component of any system, or as critical technology as part of any system, unless an exception applies or a waiver has been granted.

Urmet S.p.A. hereby declares that the products listed in the following sheets use a main chipset (SoC) that is in compliance with Section 889 of the NDAA.
